Glimpse of Elomatic business

Offshore Energy

- Windmill foundations
- Artificial energy Islands
- Substation platforms
- Offshore structures

Process & Energy Industry

- P2X
- Bio-energy and -refineries
- Combined Heat and Power
- District heating & cooling
- Energy efficiency

Machine Engineering

- Harbour and shipyard cranes
- Pulp and paper machines
- Vehicles and mobile machines
- Special production machines
- Military devices

Pharmaceutical

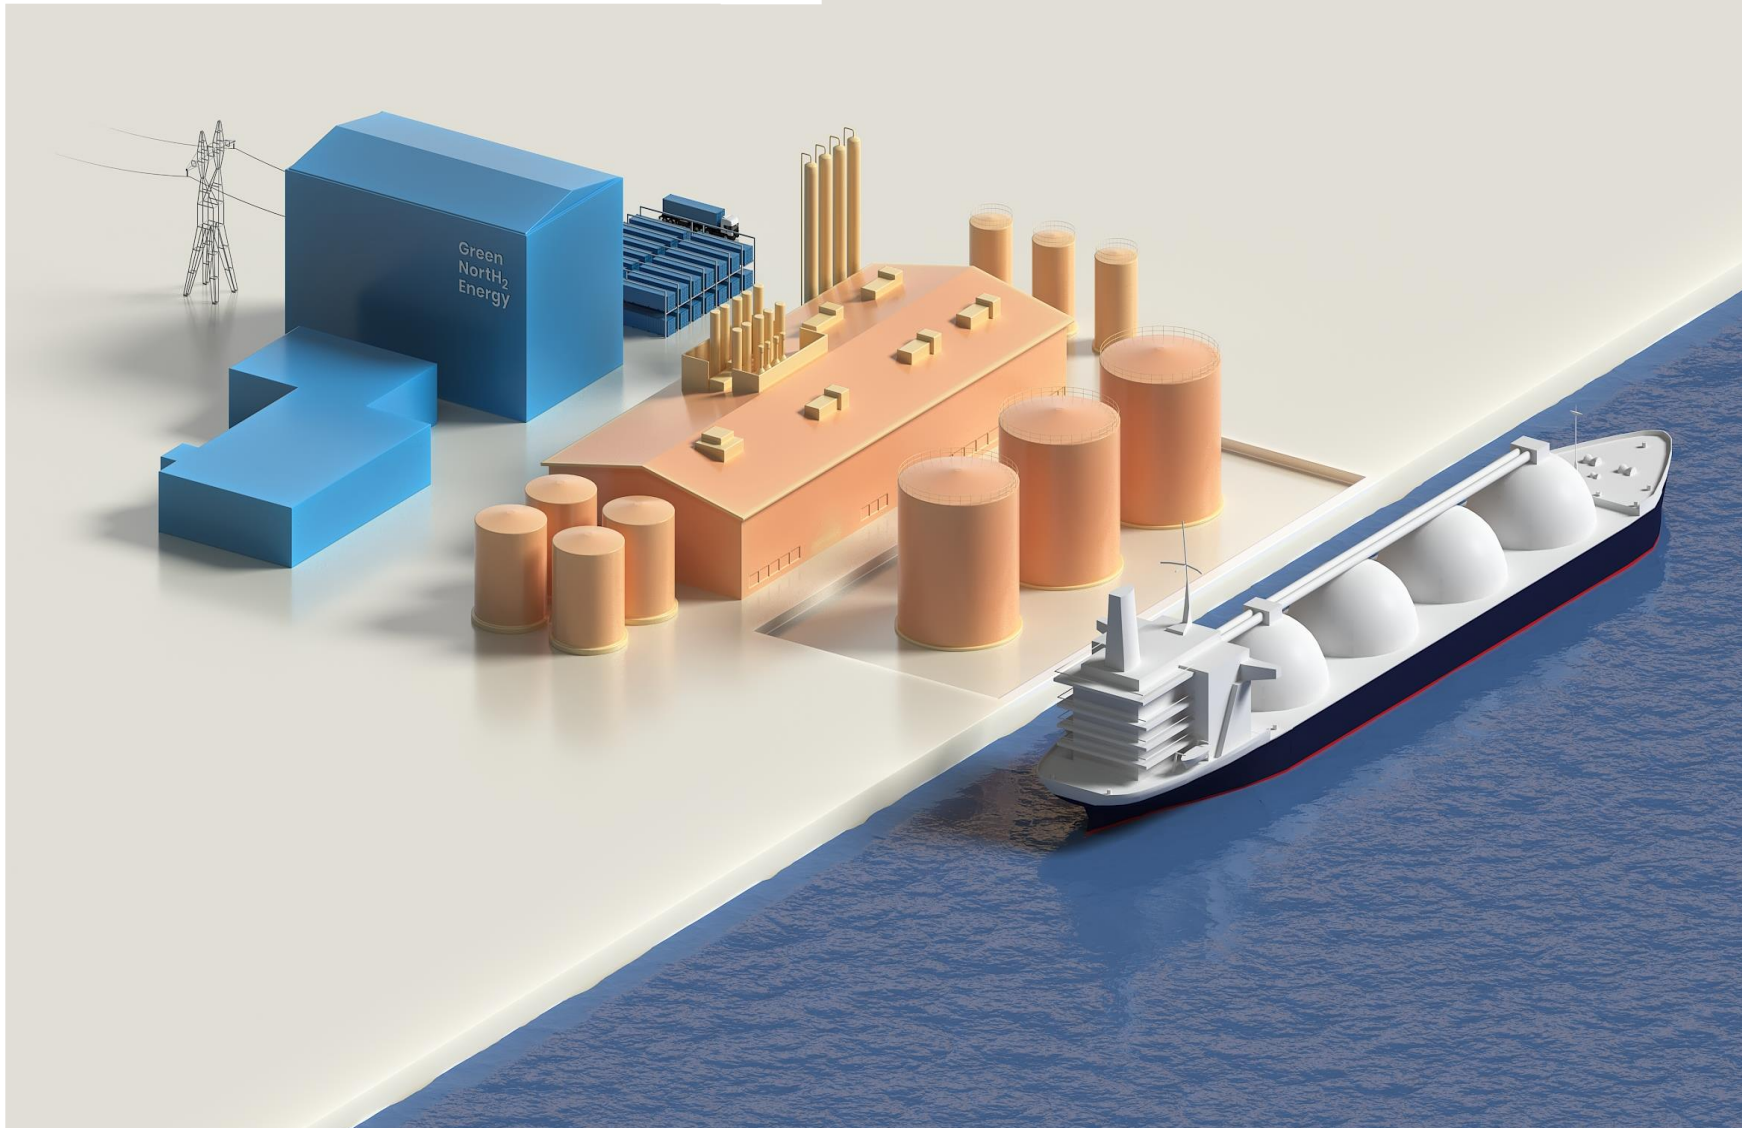

- Injectables
- Oral solid dosages
- Plasma derived medicinal products
- Vaccines
- Biosimilars
- Technology transfers

Marine

- Technical consulting
- Feasibility studies
- Concept development
- Basic & Detail Design
- Project Management

Green
North₂
Energy

2021

Established to play a major role in the growing Finnish green fuel and chemical market

Finland's best-located green hydrogen project with strong political support

Immediate incremental commercial applications with synthetic products

Access to world-class engineering capability

Well to Wake

Wind to Thrust

Thank you!
